Experience

Front-End Developer trainee (React.js)

Jul 2024 – Sep 2024

UN Women – Egyptian Council / Frontend Advanced Level

- Built a full e-commerce web application using React.js, Zustand, and React Router.
- Implemented responsive layouts across desktop and mobile using modern UI practices.
- Optimized global state management and reusable component structure.
- Used GitHub for version control and deployed all projects using Vercel.

Projects

- Vision City Engineering Services:** [Live Demo](#) A modern corporate website built with Next.js, TypeScript, and Tailwind CSS for an engineering services company. The website features a responsive Arabic-first design, optimized user experience, and clear presentation of engineering services.
- Baraat Al Mostaqbal Fiberglass:** [Live Demo](#) A modern responsive website built with Next.js, TypeScript, and Tailwind CSS for a fiberglass company. Designed to present the company's services and products with a clean, professional, and mobile-friendly user experience.
- E-Commerce Website:** [Live Demo](#) A responsive e-commerce website built with React, JavaScript, HTML, and CSS. The project provides a smooth shopping experience with product browsing, category filtering, and interactive UI components.

Education

Bachelor of Computer Science
